---

PROFESSIONAL EXPERIENCE

FRANKLIN TEMPLETON

Senior Analyst | August 2022 – Present

Derivative Reconciliation | August 2022 – Present

- Manage end-to-end **derivative and collateral reconciliation** across institutional and retail fund portfolios.
- Reconcile **trades, positions, collateral balances and cash movements**, identifying breaks and coordinating timely resolution.
- Apply strong knowledge of **corporate actions and securities lifecycle events**, including their impact on positions, cash and downstream operational processes.
- Investigate exceptions and perform root-cause analysis in collaboration with **Trading, Operations, Compliance, Client Service, brokers and custodians**.

- Support **Equity Options, Index Options and Indian AMC Futures & Options**, including collateral monitoring, assignments and lifecycle events.
- Monitor pledged securities and collateral coverage and support portfolio and trading teams with accurate operational information.
- Develop **Power BI dashboards and reconciliation reports** for exception monitoring, aging analysis and operational trends.
- Developed **PowerApps-based workflows** to automate manual processes and improve reconciliation efficiency and accuracy.

Regulatory Reporting | October 2023 – June 2025

- Supported daily regulatory reporting under **EMIR, UKMIR and ASIC**, ensuring accuracy, completeness and compliance.
- Reconciled and analyzed **trade, valuation, position and notional data** to identify reporting exceptions and mitigate regulatory risk.
- Designed and implemented reconciliation controls within the **Data Quality Management (DQM)** platform.
- Migrated reconciliation processes from legacy systems to DQM, reducing manual intervention and strengthening controls.
- Developed new reconciliation checks to address control gaps and improve data quality.
- Built **Power BI exception-monitoring reports** for proactive issue identification and stakeholder reporting.
- Supported **UKMIR and ASIC Refit** through testing, data validation, issue remediation and implementation activities.
- Worked with **J.P. Morgan and Morgan Stanley** on SFTP-based data integrations to improve data availability and operational workflows.
- Led an **ASIC trade backloading project**, delivering approximately **USD 10,000 in cost savings** while maintaining reporting completeness and compliance.

G D UPADHYAY AND CO.

Audit Assistant & Regulatory Reporting | June 2021 – June 2022

- Supported **audit and regulatory reporting activities**, ensuring accuracy, completeness and compliance.
- Reviewed financial data and documentation, identified discrepancies and supported timely resolution.
- Worked with clients and internal teams to gather information and complete reporting deliverables within deadlines.

KEY ACHIEVEMENTS

- Delivered approximately **USD 10,000 in cost savings** through an ASIC trade backloading initiative.
- Strengthened data-quality controls by implementing reconciliation checks within **DQM**.
- Successfully migrated legacy reconciliation processes to DQM, improving efficiency and control effectiveness.
- Automated manual operational processes using **PowerApps**.
- Developed **Power BI dashboards** improving visibility of exceptions, aging breaks and operational trends.
- Established **SFTP-based data integrations with J.P. Morgan and Morgan Stanley**.
- Built strong expertise across **Corporate Actions, Securities Lifecycle, Derivatives, Reconciliation and Financial Data Quality**.
